EXTRA PRACTICE · BLOCK 1, DAYS 15 TO 18

Adding and Subtracting Whole Numbers and Decimals

#5

Grade 5 Math

Name: _____ Date: _____

Learning goal: I can add and subtract whole numbers and decimals using different strategies.

1 Add or subtract. Show your work.

a) 34 528 + 21 361 b) 48 275 + 17 958 c) 60 000 − 23 457 d) 72 314 − 38 629

2 Add or subtract the decimals.

a) 4.25 + 3.6 b) 9.3 − 2.75 c) 12.08 + 0.95 d) 10 − 3.46

3 Use a mental math strategy: **4 999 + 2 345**. Explain your thinking.

4 Estimate first, then find the exact answer: **39 870 + 20 140**

5 A school library had **12 450** books. It got **1 875** new books, then gave away **960** old ones. How many books does it have now?

6. Ava buys a sandwich for **$5.75** and juice for **$1.89**. She pays with a $10 bill. How much change does she get?

7. Jordan says **5.2 + 3.45 = 3.97**. What mistake did Jordan make? What is the correct answer?

TIP FOR FAMILIES

Ask your child to estimate first, then calculate, then check that the answer is close to the estimate. With decimals, line up the decimal points (add a zero if it helps: 5.2 is 5.20).

Answers

Try the handout first, then check together. Where it says “answers vary,” any correct example counts.

1. a) 55 889 b) 66 233 c) 36 543 d) 33 685
2. a) 7.85 b) 6.55 c) 13.03 d) 6.54
3. 7 344. For example: 5 000 + 2 345 = 7 345, then subtract 1.
4. Estimate: about 40 000 + 20 000 = 60 000. Exact: 60 010.
5. 12 450 + 1 875 = 14 325; 14 325 − 960 = 13 365 books
6. $5.75 + $1.89 = $7.64; $10.00 − $7.64 = $2.36
7. Jordan did not line up the decimal points (added 0.52 + 3.45). Correct: 5.20 + 3.45 = 8.65.
